Dr. Rui-de Xue

BOARD OF COMMISSIONERS:

Gary Howell, Chairperson
Gina LeBlanc, Vice-Chairperson
Jacqueline Rock, Secretary/Treasurer
Catherine Brandhorst, Commissioner
Jeanne Moeller, Commissioner

July 27, 2018

PUBLIC NOTICE

In compliance with Federal Regulations of the Federal Aviation Agency, public notice is hereby given that the Anastasia Mosquito Control District will inspect for immature mosquitoes and spray for immature and adult mosquitoes over congested areas in St. Johns County. Aircraft will fly at altitudes under 500 feet throughout the calendar year, January 1, 2019 through December 31, 2019, for the suppression of mosquito populations when and where such flights are necessary.

Inspection flights and landings will be made with helicopters for the purpose of locating and treating immature stages of mosquitoes in fresh and salt marsh flood areas. This is vital to the detection and suppression of immature mosquitoes after rainfall and high tides.

Both nuisance and disease important mosquito populations will be suppressed by rotor (helicopter) and fixed-wing (airplane) flights within the boundaries of St. Johns County.

A qualified and approved contractor may provide fixed-wing ultra-low volume application of pesticides within the boundaries of St. Johns County during periods of severe mosquito infestation or when it is necessary to mitigate the potential of mosquito-borne disease.

All such flights will be made in the public interest at such times as are considered necessary and under such conditions considered effective for the purpose of providing comfort and public health protection for the residents and visitors.

Adult mosquito spray flights typically occur between sunset and sunrise and are posted on the Anastasia Mosquito Control District website prior to the flights. For access to this information, go to (www.amcdsjc.org). Notices will be posted on the front page of the web site and the service request entry page. Notification will also be sent to users of the AMCD service request application.
